

Industrial Managed Rack-Mount Modular Gigabit Ethernet Switch

RHG7528 / RHG7628 Series

### **Hardware Installation Guide**

Version 2.0 Updated in October, 2017

Tel: 886-3-5508137 Fax: 886-3-5508131 www.atop.com.tw

P/N:89900501G

## **Package Check List**

Inside the package you will find the following items:

- Industrial Managed Rack-Mount Modular Gigabit Ethernet Switch x 1
- Rack Mount Kit x 2
- 4-pin Terminal block x 1 for the relay output
- 3-pin Terminal block x 1~2 for the DC models power input
- Protective caps for all SFP ports (Depend on purchased model)
- Installation Guide with Warranty Card x 1

A

Never install or work on electrical or cabling during periods of lightning activity. Never connect or disconnect power when hazardous gases are present.

Warning:Hot Surface Do Not Touch.

Caution: CLASS 1 LASER PRODUCT. Do not stare into the laser!

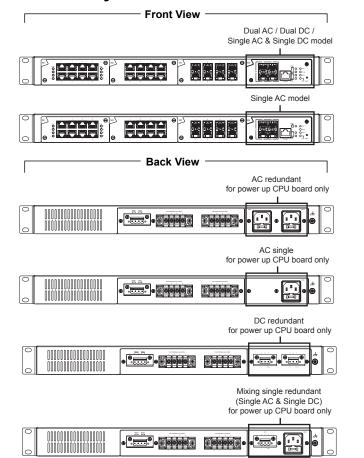

This equipment should be installed indoor and not connect directly with equipment installed outdoor.

Throw the device must follow RoHS procedure to recycle

## **Product Layout**

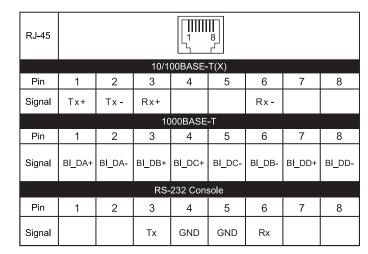

#### Installation Overview

The device's appearance is as in the figure below.

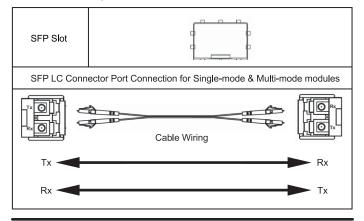

- Ground the device properly. You can use the FG pin in the terminal block. It is required to connect to the grounds at all times to ensure overall maximum performance.
- If you opt to place the device on a rack, you will need to secure the rack mounts kit on to the device before placing it on the rack. If you opt to place the device on a surface, you can put on the foot rubbers to prevent the device from sliding.
- You can then choose whether to plug in the I/O ports at this point or do it later.
   Next you can then proceed to connect the device to the LAN (switch or PC), take care on using the RJ-45 connector; after this we can then proceed to the device's settings.
- The openings to the sides are for the devices heat dissipation. Please never obstruct or cover them with any objects.
- 5. This switch's factory IP by default is 10.0.50.1. you can access the device by its Web UI once it is connected to a physical network (or using Management Utility, for more information on Management Utility, please refer to its manual). Please be aware that the PC needed for this procedure needs to be in the same subnet, or you may refer yourself to the device User's Manual.

# **Pin Assignments and Connections**

10/100/1000BASE-T(X) Ethernet, and RS-232 Console Pinouts

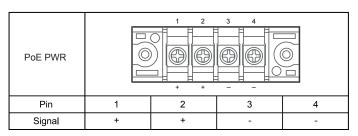

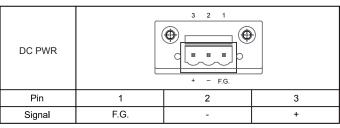

1000BASE-X Fiber Optics SFP Slot

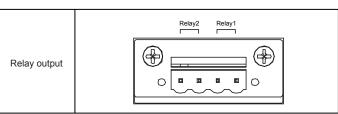

#### Caution

The SFP slot should be used in conjunction with a MSA compliant optical transceiver.

## **Power Requirements**

■ Power input : 110-220 VAC, 0.58 A Max, 64W Max (For AC version models)

48-57 VDC, 0.68A Max, 32.7W Max (For DC version models) 45-57 VDC, 8.4A Max, 370W Max (For 802.3af models)

51-57 VDC, 14.4A Max, 720W Max (For 802.3at models)

■ Alarm output : 1A@24A VDC for signal use only

## **LED Indicators**

### Field Maintenance and Service

If the device requires servicing of any kind, you may need to disconnect and remove it from its mounting. The initial installation should be done in a way that makes this as convenient as possible.

- Voltage/Power lines should be properly insulated as well as other cables. Be careful when handing the so as to not trip over
- Do not under any circumstance insert foreign objects of any kind into the heat dissipation holes located in the different faces of the device. This may not only harm the internal layout but might cause harm to you as well
- Do not under any circumstance open the device for any reason. Please contact your dealer for any repair needed or follow the instructions on section of your User's Manual.

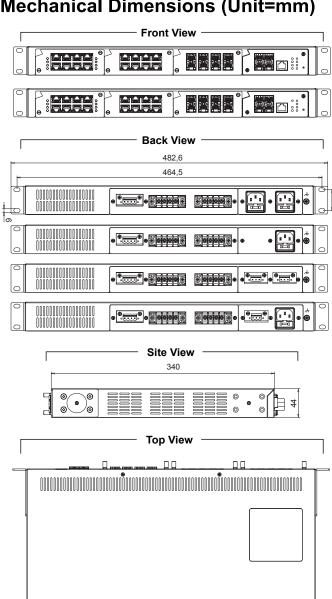

### **Attention**

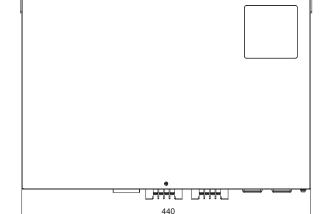

- 1. It is recommend to use at least a 20 AWG cable for the AC power input. It is suggested the cable to be resistant to at least 85°C temperature on the power connector.
- 2. If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may not be impaired.
- 3. Clean the device with dry or humid (water) soft cloth.
- 4. Before powering on the device, the Functional Ground (Grounding Screw) shall be connected to the ground.
- 5. If the device is AC please connect PWR1. If AC redundant, connect PWR1 and PWR2 to the 100~240V AC power source. This power input manages the full device functions except from PoE.
- 6. If the device is DC powered, please connect DC1 and DC2 to the DC power supply.
- 7. If PoE is going to be used, also POE PWR1 and POE PWR2 should be connected to 48~57 VDC power supplies). In order to avoid overheat and damages to the internal components the user should follow the below auidelines:
- Total PoE power needed is <= 360W: connect to either power supply POE PWR1 or POE PWR2 or both.
- Total PoE power needed is >360W but <=720W (max): connect to both POE PWR1 and POE PWR2 in order to avoid overhead.
- 8. POE PWR1 or POE PWR2 support maximum input 360 W.
- 9. POE PWR1 / POE PWR2 , + / pins should be connected in same PWR input Terminal block, please don't cross-connect.

### **Environmental Limits**

- Operating Tem perature: -40 to 75°C (-40 to 167°F)
- Storage Temperature: -40 to 85°C (-40 to 185°F)
- Ambient Relative Humidity: 5 to 95%, 55°C (non-condensing)
- Altitude: up to 2,000 m
- Housing Protection : IP 30

## **Mechanical Dimensions (Unit=mm)**

\* The wall mount kit illustrated in this document is for reference only and is not included in the package

### **Warranty Policy**

#### **Warranty Conditions**

Products supplied by Atop Technologies are covered in this warranty for sub-standard performance or defective workmanship. The warranty is not, however, extended to goods damaged in the following circumstances:

- (a) Excessive forces or impacts
- (b) War or an Act of God: wind storm, fire, flood, electric shock, earthquake
- (c) Use of unqualified power supply, connectors, or unauthorized parts/kits
- (d) Replacement with unauthorized parts

#### RMA and Shipping Costs Reimbursement

Customers shall always obtain an authorized "RMA" number from Atop before shipping the goods to be repaired to Atop. When in normal use, a sold product shall be replaced with a new one within 3 months after purchase. The shipping cost from the customer to Atop will be reimbursed by Atop.

After 3 months and still within the warranty period, it is up to Atop whether to replace the unit with a new one; normally, as long as a product is under warranty, all parts and labor are free of charge to the customers.

After the warranty period, the customer shall cover the cost for parts and labor. Three months after purchase, the shipping cost from the customer to Atop will not be reimbursed, but the shipping cost from Atop to the customer will be paid by Atop.

#### Limited Liability

Atop shall not be held responsible for any consequential losses from using Atop's product.

#### **Warranty Period**

Product Categories	Warranty	Product Categories	Warranty	
Ethernet Switches	5 Years	DIN-Rail Power Supplies	3 Years	
Wireless				
Serial Device Servers		Power Adaptors	1 Year	
Modbus Gateways		Antennas		
Media Converters		7 titorinao		
Embedded Device Servers		Other Accessories		

The warranty certification will not be effective until an authorized stamp issued by Atop's overseas agents.

Purchase Date:	/	/	(yyyy/mm/dd)
Serial Number			

#### **Atop Customer Services and Supports**

- 1. Please contact your local dealers or Atop Technical Support Center at the following numbers.
- + 886-3-550-8137 (Atop Taiwan)
- + 86-21-6495-6232 (Atop China)
- 2. Please report the defected problems via Atop's Web site or E-mail account Web Site: www.atop.com.tw, e-mail: service@atop.com.tw Web Site: www.atop.com.cn, e-mail: service@atop.com.cn
- 3. Company Addr: 2F. No. 146. Sec. 1. Tung-Hsing Rd., Jubei, Hsinchu 30261. Taiwan, R.O.C.

Manufacturer Addr: 1st FL 30 R&D RD II SCIENCE-BASED INDUSTRIAL PARK, HSINCHU 300 TAIWAN, R.O.C

Any changes to this material will be announced on Atop website.
